

BUY BACK

With Buy Back, you sell your products to us in part-payment for new equipment.

When your company buys new equipment from Telia, you can get discounts by allowing us to buy back old equipment.

We deal with the complete handling process here at Telia Finance. This allows you to free up capital while also guaranteeing that your equipment will be disposed of in an eco-friendly way owing to the fact that we work with certified partners who delete all your old information and recondition or recycle the products.

LEASING IS GOOD FOR THE ENVIRONMENT

Leasing your technical equipment is a flexible and economical way of accessing the latest technology. Another advantage which has become increasingly apparent of late is the fact that a leasing solution is also good for the environment. When you lease your technical equipment, every component becomes part of an eco-cycle where everything that can be recycled or reused is utilised. Visit teliafinance.com to find out more about this

This is how Buy Back works:

- We review your old products and offer you a price.
- This price becomes a discount when you buy new equipment.
- We are responsible for collection, registration and reporting of the equipment received.
- This transfers all the risk in respect of the condition and financial value of the equipment to Telia Finance.
- All content is deleted by our partners using special software. They also recondition, recycle and/or dispose of the equipment in an eco-friendly way.

Important to know:

- It is not necessary for the equipment which you sell back to us to have been bought from Telia originally.
- To get the discounts, you have to supply the agreed volumes within the agreed time.
- It must be possible to start all telephones.
- The "Find My iPhone" function has to be disabled.

HOW TO TAKE THE NEXT STEP

Would you like to find out more about our offers or place an order? Contact us by phone 0771 88 30 50 or by visiting teliafinance.com.
